

FAST. FORWARD.

WESCAM MXSM-SERIES SERVICE COMPONENTS, SPARE UNITS AND UPGRADES

Providing you with Tailored Service and Support Packages that Address your Individual Needs.

L3Harris has a selection of comprehensive maintenance service options to fit every level of mission requirement. Options can be tailored to fit your operational needs and budget.

FIRM-FIXED-PRICE PER SYSTEM

> A firm-fixed-price per system contract provides a predictable cost structure for the customer. The contract covers all labor, materials, and overhead costs for the duration of the contract. This option is ideal for customers who want to control their budget and ensure consistent pricing over time.

PERFORMANCE-BASED LOGISTICS

> Performance-based logistics contracts focus on the overall performance of the system rather than just the cost of parts and labor. These contracts typically include a target level of availability and a corresponding financial incentive for the provider to maintain that level. This option is ideal for customers who want to ensure high system availability and reduce total cost of ownership.

SUPPORT-BY-THE-FLIGHT-HOUR

> Support-by-the-flight-hour contracts provide a fixed cost per hour of system operation. This option is ideal for customers who want to align their maintenance costs with the actual usage of the system. The contract typically covers all labor, materials, and overhead costs for the duration of the contract.

WARRANTY AND EXTENDED WARRANTY

> Warranty and extended warranty contracts provide a fixed cost for the duration of the contract. These contracts typically cover all labor, materials, and overhead costs for the duration of the contract. This option is ideal for customers who want to ensure system reliability and reduce the risk of unexpected maintenance costs.

REPAIR-ON-DEMAND

> Repair-on-demand contracts provide a fixed cost per repair. This option is ideal for customers who want to pay only for the repairs they need. The contract typically covers all labor, materials, and overhead costs for the duration of the contract.

WESCAM MX SERIES AUTHORIZED SERVICE CENTERS

> Wescam MX Series Authorized Service Centers provide a fixed cost per repair. This option is ideal for customers who want to ensure system reliability and reduce the risk of unexpected maintenance costs. The contract typically covers all labor, materials, and overhead costs for the duration of the contract.

L3HARRIS' IN-SERVICE SUPPORT SERVICES ARE DESIGNED TO:

- > Increase operational availability (Ao)
- > Minimize repair turn-around time (RTAT)
- > Enable 70% of repairs to be done in the field
- > Reduce total cost of ownership
