

## Single-Band 700/800 MHz Mobile Radio

The L3Harris XL Onboard 85M mobile radio is a feature-rich, cost-effective option for reliable, mission-critical communications. With P25 Trunking, Phase 1 and Phase 2 capabilities, this radio is outstanding for first responders and utility customers who need to manage their migration needs with just one device.

The ride is always smoother with a best-in-class radio by your side. The XL Onboard Series P25 radios bring unflinching critical communications to any vehicle in your fleet. Connect in more ways than ever with Wi-Fi, Bluetooth® and GPS capabilities. Let's go.

XL Radios run on systems that double down on redundancy, champion open networks and connect seamlessly with P25-compliant organizations.

Our AES-256 encryption provides an end-to-end secure configuration, keeping you safe from threats.

Our service packages keep your radios up and running with in-field preventative maintenance and software upgrades.
